

A1 directory enquiry facility to the terminal on the second channel (DCHAN);
receiving the numeric string at the terminal;
determining the telephone number from the numeric string; and
storing the telephone number in a memory in the terminal provided for direct
dialing of telephone numbers.

2. A process according to claim 1, whereby the directory enquiry facility also issues
an action command that causes the terminal to determine the telephone number from the numeric
string and to save the telephone number in the memory in the terminal provided for direct dialing
of telephone numbers.

3. A process according to claim 1, whereby the telephone number is displayed on a
display in the terminal.

A2 9. A directory enquiry facility according to claim 6, wherein the facility is equipped
to issue an action command which causes the terminal to determine the telephone number from
the numeric string and store that telephone number in a memory of the terminal provided for
direct dialing of the telephone number.

— Please add the following new claim:

11. (New) A directory enquiry telephone number transmission system,
comprising:

A3 means for transmitting an enquiry with data describing a desired subscriber from
a terminal to a directory enquiry facility on a first channel for voice transmission;

means for transmitting a telephone number in the form of a numeric string from
the directory enquiry facility to the terminal on a second channel for data transmission;

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APP. NO. 09/199,320

means for receiving the numeric string at the terminal;

A3 means for issuing an action command by the directory enquiry facility to cause the terminal to determine the telephone number from the numeric string and to save the telephone number in the memory in the terminal provided for direct dialing of telephone numbers.
